

About this tool

Where is this tool being used and why?

Larimer County collaborated with community partners to develop coordinated services and a tool for educators in early childhood settings. The tool and services are specific to children who may be high risk and have social and emotional challenges.

This tool was established to provide educators with support and a means of screening in order to best meet the child's social and emotional needs in the classroom setting and beyond.

Thanks to the following list of community partners involved with the development of this tool:

- Early Childhood Council of Larimer County
- SummitStone Health Partners
- Thompson School District
- Larimer County Department of Health and Environment
- Abbey Schneider- LMFT +IMH-E

Early Childhood Challenging Behavior Tool
